SUMMARY

Product Manager with 4+ years of experience building enterprise SaaS, networking, and AI-powered products. Experienced in translating customer feedback, telemetry, and business data into product strategy, launch programs, and scalable workflows. Proven track record leading cross-functional initiatives across Product, Engineering, Legal, and GTM teams to drive adoption, operational efficiency, and customer outcomes.

EXPERIENCE

Hewlett Packard Enterprise

May 2022 – Present

Product Manager 3

San Jose, CA

- Drove a **90% reduction in outage related support cases** and **30% drop in reactive cases** by architecting a closed loop across three product areas: Sales Engineering reports, product UI visibility, and AI-powered NLP copilot for SASE operations.
- Architected the **post merger commercial backbone** across two legacy companies: SilverPeak and HPE Aruba, consolidated COGS into a single source for Sales and Finance, accelerating sales quote turnaround by over **25%** eliminating pricing inconsistencies.
- Drove **CEO level** competitive pricing and bundling strategy across 3 major competitors for hardware, SD-WAN, security, and support, by conducting SKU level margin analysis to reposition GTM and set discount.
- Converted **20% of the SD-WAN only customer base to SASE in two quarters** by designing a free license adoption incentive with Sales Operations team, advancing the strategic push for SASE penetration after Axis's acquisition.
- Defined requirements and built functional **prototypes for AI Canvas**, an AI-powered workspace that transforms ideas into structured requirements, workflows, and execution plans, accelerating stakeholder alignment and engineering delivery.
- Led the strategy and development of SASE Intelligence, a **GenAI-powered product copilot** that unified customer feedback, support cases, Jira data, feature adoption, and production observability into actionable insights, translating customer pain points into prioritized engineering recommendations and roadmap decisions.
- Spearheaded the **AI Governance and Ethics framework** ahead of 2026 regulatory deadlines across **500+ enterprise customers**, partnering with Legal on consent flows for AI services and rapid prototyping UX enabling Engineering to ship in under a week.
- Designed and launched the Early Adopters beta program from scratch (**0 to 1**), partnering with Product, Engineering, Support, and customers to establish scalable feedback loops, identify release risks, and improve launch readiness, resulting in a 15% reduction in P0 escalations across 3 releases.
- Established and led **quarterly feature usage analytics** reviews, partnering with Product and Engineering leadership to identify adoption trends, customer pain points, and roadmap investment opportunities.

Product Specialist Intern

- Owned the **monthly executive business review (MBR)** for the leadership team, using Power BI analytics on customer segmentation, revenue, and forecasting to inform roadmap, GTM, and investment decisions.
- Built business case for SD-WAN expansion into adjacent multicloud market using market research, SWOT, competitive landscape and future growth potential; presented recommendations to senior management to grow market share by up to **20%** in a **\$2B** market.
- Launched a new XaaS subscription tier licensing model feeding the HPE Aruba software supply chain process.

MBA Consulting Engagements (Genesys, City of Berkeley)

Spring – Fall 2022

Consultant

San Francisco, CA

- Genesys Cloud CX: Modeled and segmented customers by Annual Contract Value (churned, expanded, plateaued, downsized) and identified leading indicators of adoption and growth to inform targeting strategies.
- City of Berkeley: Identified investors through qualitative and quantitative metric analysis to lower the cost of emergency healthcare.

Wipro Limited

2019 – 2021

Software Engineer

Bangalore, India

- Enhanced Cisco IE series switch features in L2 protocol to expand IoT capabilities; handled customer issues, code reviews, and delivery tracking across 4 client projects.

EDUCATION

MBA in Business Analytics

May 2023

University of San Francisco (Merit Scholarship Recipient)

San Francisco, CA

B.Tech in Computer Science and Engineering

May 2019

GLA University

Uttar Pradesh, India

TECHNICAL SKILLS

Languages & Tools: Agentic AI (RAG, LLM, Context Engineering, Finetuning, EVals), VSCode, ClaudeCode, Python, R, SQL, Java, JavaScript, HTML/CSS, Power BI, Tableau, AWS (S3, EC2), MS Excel

Certificates and Courses: Mastering Agentic AI by Maven, AI for Everyone (Andrew Ng), Crash Course in AI (Stanford), R Programming for Data Science

LEADERSHIP / EXTRACURRICULAR

- Consultant for Startup Club at USF supporting new ventures in technical and business analytics aspects
- Initiated wellness workshops for underprivileged adolescent girls with Asha Niketan, a non-profit. Taught kids aged 7-12
- Fundraiser, Ketto.org, India, Helped raise funds for over \$10,000 to support cancer patients
- Secretary of Executive Committee, Poetry Club. Other hobbies: Sketching, Painting, Dancing
